Important information

Without exception, all current safety regulations and guidelines must be observed in those countries where our products are used.

Computer graphics are used which are to be understood as system representations. For ensuring a better understanding, this and the detailed illustration shown have been partially reduced to certain aspects. The safety installations which have possibly not been shown in these detailed descriptions must nevertheless be available.

The systems or items shown might not be available in every country.

„Notes“ as well as „Technical Data“ are to be strictly observed at all times. Separate structural calculations are required for any deviations from the standard configuration and represent an unintended use with a potential safety risk.

The information contained herein is subject to technical changes in the interests of progress. Errors and typographical mistakes reserved.
